

Space Weather Community Operations Workshop 2013 | Space Weather Center

11/07/2013

The Space Weather Community Operations Workshop (SpWxCOW) will bring together commercial, agency and university Space Weather operational personnel in a 2-day meeting to promote a robust data exchange capacity within the Space Weather enterprise. Participants will share common operational problems and solutions as well as work toward developing common best practices, and eventually standards, for Space Weather operations.

2012 and 2013 Recaps

Below are links to the recaps of the 2012 and recently completed 2013 workshops. Included are links to the workshop reports, as well as the presentations presented at the workshops.
